

Now you can work smarter and be more productive with new NavigatorV® tools.

NavigatorV® Release 6.1 Includes These Exciting New Features

LogIT™ Tool

LogIT™ improves access and compliance tracking by creating personal folders of viewed documents. Use it to track documents for a specific aircraft, work order, or maintenance event.

New EASA Regulatory Support

NavigatorV® provides the first and only Profile and Compliance tool to update and maintain compliance records for both FAA and EASA ADs.

Automated ATP® Product Access Codes

Automatically update expired access codes over the Internet using NavigatorV® Product Registration.

ATP® Product Catalog Available in NavigatorV®

ATP's product catalog provides a quick way to search for all ATP® libraries and products. The catalog is continuously updated with the most recent ATP® library information.

AskBob™

AskBob™ is the online resource for getting expert advice on ATP's product content. Look here for ongoing advice on solutions to improve your aviation maintenance business operations.

New EZ Update Functionality

EZ Update includes a new FTP option to increase the download speed of your ATP® content revisions.

FAA Online Form 337

NavigatorV® now includes a link to the online electronic version of the FAA Form 337 so you can submit your completed forms electronically.

New Tool Menu Commands

- Access NavigatorV® Disc Manager from the Tools menu to view the currency of your ATP® libraries.
- Access Product Registration from the Tools menu to update access codes.
