We Save You Money By Saving You Time

If you maintain a maintenance library on your own, you’re wasting valuable work hours. With the ATP library staff on your side, you can put your time to better use. And with the ATP® advanced search and indexing features, you can save even more time by getting the information you need faster.

Just think … if we save you just on hour per week (and most ATP users report saving significantly more), at a shop wage of only $15 per hour, you’re saving $780 a year. And the greater your information needs, the more time (and money) you save with an ATP® library service. Savings include:

- Decreased acquisition costs.
- Increased efficiency in finding your information.
- Decreased time in filing revisions.
- Increased confidence in the currency of your information.

That’s the value you get when you put an ATP® library service to work for you!
